

## E-Business Suite

### The Vision

Providing its customers with world-class core banking solutions and financial management business solutions, Fidelity National Information Services (FIS) is proud to partner with Oracle® in offering selected Oracle E-Business Suite applications. FIS will provide the Oracle E-Business Suite's "Financials" modules as primary components of its existing core banking offerings. FIS can also deliver targeted corporate performance management applications from the E-Business Suite to provide a comprehensive financial management solution:

- Projects
- Procurement
- Business Intelligence
- Enterprise Asset Management
- Enterprise Planning and Budgeting

### E-Business Suite

Traditionally, financial services institutions have had to work with multiple vendors to meet their core banking and business management IT needs. By partnering Oracle – the world's largest enterprise software company – with FIS – an industry leader in best-of-breed core banking solutions – the best possible integrated financial solutions are available from a single vendor. This simplifies IT management, support and vendor relations. And by acquiring all solutions "under one roof," clients realize a lower Total Cost of Ownership (TCO) and an increased Return on Investment (ROI) – both enormously important to shareholders and bottom lines.

### Modules of the E-Business Suite

FIS will leverage modules of the Oracle E-Business Suite to provide financial institutions a complete enterprise suite, including financial and corporate performance management, project management and business intelligence. The Oracle applications include:

- Financials
  - General ledger, Accounts Payable, Fixed Assets, Global Consolidations, Internet Expenses and Property Manager
- Procurement
  - Internet Procurement, Internet Sourcing, iSupplier Portal and Sourcing
- Projects
  - Project Costing, Project Management and Project Resource Management
- Business Intelligence
  - Financial, Purchasing, Projects and Daily Business Intelligence Balanced Scorecard
- Enterprise Planning and Budgeting
- Enterprise Asset Management

FIDELITY NATIONAL  
INFORMATION SERVICES

## Benefits to Financial Services Institutions

- Acquire both world-class core banking solutions and e-business solutions from a single vendor
- Lower cost (TCO) and increased value (ROI)
- Support and system management capabilities from a single vendor
- Flexible delivery model
- Best-of-breed functionality from the world's largest enterprise software company
- Seamless integration with core Fidelity banking applications
- Financial services industry best practices

## Know More, Do More and Spend Less

FIS and Oracle realize that to become a credible partner, it takes more than software and standard procedures. It requires experience, quality, innovation and a commitment to the long-term success of all parties involved. Many companies have successfully optimized their processes with FIS and Oracle software, services and support. It's the best of both worlds – two industry leaders doing what they do best to solve your needs.
