FIS Overview

As financial institutions evolve to meet today's demands and tomorrow's challenges, so too must their financial software solutions. With more than 40 years in the banking and financial services industry, FIS is dedicated to bringing advanced technology solutions to the market – best-of-breed solutions that improve the long-term competitiveness of its clients.

Banking

The challenges facing financial services organizations have never been so complex. Cost pressures remain intense, while service requirements continue to intensify. Many financial organizations are forced to acknowledge the inefficiency and costliness of existing systems, while the need to comply with regulatory requirements is requiring new expenditure. The desire to retain existing customers and attract new ones remains a key business driver as banks seek to differentiate themselves from the competition. To operate in this environment, banks need to be ready to change the way they do business and consider which technologies will produce the best combination of return on investment and flexibility to accommodate future changes.

FIS provides mortgage servicing technology and end-to-end banking and wealth management solutions to financial institutions in Canada.

FIS provides comprehensive strategic core banking solutions that support a wide range of customer, product build, deposit, lending and payment functionality for the retail banking environment. FIS offers tailored solutions including core banking applications, online banking and integrated channel solutions, professional services consulting, and lending and servicing solutions. Solutions are available on a license or ASP basis.

A flexible, open framework allows you to quickly create, launch and service new, innovative products and processes from a single platform. The result is increased productivity, reduced total cost of servicing, exception management control and technology for greater efficiencies.

Wealth Management

FIS works with financial services companies to help advisors build profitable relationships with investors. Whether you are a bank, brokerage, insurance

or financial planning company, we provide the tools and services to deepen your relationship with investors and grow your book of business.

FIS' modular solution suite is designed to support an enterprisewide wealth management strategy. Our comprehensive tool set integrates with your existing infrastructure to provide a holistic client view to various channels. This allows you to streamline workflow and enable new product manufacturing and deployment. Order management for equity, option, fixed income, and mutual fund transactions allows investors and their advisors to place, validate, and track orders in real time. Wireless access to critical market and client account information allows advisors to stay on top of the markets and in control of accounts from anywhere, anytime. The result is improved operational efficiency and compliance, increased revenue and greater advisor and investor satisfaction.

Why FIS?

Some of the world's largest financial institutions have been relying on FIS' proven, dependable, scalable systems to help them:

- Focus on their core competencies
- Reduce costs
- Minimize risk
- Increase competitive advantages
- Improve customer service and profitability

FIS' state-of-the-art ASP facility and office of dedicated industry experts are located in the heart of Toronto's financial district. FIS serves Canada's leading financial institutions, including, CIBC, ING Bank of Canada, RBC Financial Group and Scotiabank. FIS understands the Canadian market, based on years of working alongside our clients and our integration and consulting firm partners. Providing application delivery, custom development, business analysis, project management and a broad range of consulting services, FIS offers the best-of-breed solutions that enable financial solutions to succeed.
